

# Climate Risk Intelligence

## Service Offering

### Climate Change Impacts Business

Industry heavyweights are urging investors and companies to incorporate climate change awareness into their business strategy. Climate change is now a core business issue; a “must do” from a financial perspective.

Climate change will likely impact your organization, creating both risks and opportunities. According to a recent estimate, 93% of the total U.S. equities market is exposed to material climate-related risks.

### Our Bespoke Approach

Zizzo Strategy’s team of lawyers, engineers and business consultants creates industry specific climate risk services tailored to your industry’s needs. We understand how climate change impacts both the environment and investment landscape, and how these changes are managed in regulatory frameworks and financial markets. We translate our unique knowledge to help clients stay ahead of the curve.

#### Clients Include:

YMCA of Greater Toronto, Chartered Professional Accountants of Canada, Brookfield Global Integrated Solutions, Engineers Canada, Canadian Electricity Association, Clean Energy Canada, Institute for Catastrophic Loss Reduction, Credit Valley Conservation, International Union for the Conservation of Nature, Forestry Products Association of Canada.

### Suite of Services

#### Climate Risk Strategy Development

We create custom climate risk strategies with actionable items to reduce your risk and seize new opportunities in the short, medium and long term.

#### Disclosure and Reporting

Companies’ required and voluntary disclosures are rapidly evolving. From regulatory filings to GRI & SASB: we help make sense of these developments and position you for success.

#### Training and Mandate Development

We provide tailored training and education seminars for executives, boards, and other decision-makers. In-person seminars can be enhanced with customized materials to illustrate climate-related risks and opportunities.
